

The 935 was certainly one of Porsche's success stories, and when Kremer took it over it got even better. One of the reasons was the aggressive front spoiler lip/splitter and most importantly the lip (or fence) running along the outside top edge of the front fenders. It kept the air on the front of the Porsche car longer, creating significant downforce.

935 KREMER

- 190 935 K3 BODY PACKAGE PRICE \$2190.95 N.A.
